

**Victor OGNIVTSEV** is Officer-in-Charge of Trade Analysis Branch, Division on International Trade, UNCTAD secretariat. In this capacity, he supervises research and analysis of global and regional trade-related policies and strategies; monitoring the evolution of international trade, in particular issues of concern to developing countries. With regard to non-tariff measures (NTMs), Victor coordinated organization and work of UNCTAD-initiated Group of Eminent Persons on Non-tariff Barriers (NTBs) and its Multi-Agency Support Team. Most recently, he coordinated UNCTAD's contribution to a successful launch of a joint Transparency in Trade Initiative (TNT), which is implemented jointly by UNCTAD, the World Bank, International Trade Centre and the African Development Bank, He also supervises trade policy research and analysis, including on several new topics such as integration of developing countries in global supply chains and raising their exports' value addition. Earlier (in 1989-2003), he coordinated UNCTAD's research, policy and economic analysis, and technical cooperation in support of developing countries and economies in transition acceding to the World Trade Organization (WTO) and contributed to UNCTAD's policy analysis and technical assistance to developing countries during and after the Uruguay Round of multilateral trade negotiations. Victor holds an advanced university degree from the Moscow State University of International Relations.

**Christian Knebel** is Associate Expert in the Trade Analysis Branch at UNCTAD. He specializes on research and technical cooperation regarding trade policy, particularly non-tariff measures and regional integration. Previously, he was a consultant at the Market Analysis and Research section at the International Trade Centre (ITC, Geneva). He authored reports about obstacles to trade faced by companies in Malawi, Peru, Sri Lanka, Paraguay and Uruguay, and assisted their governments on trade policy issues. He was also research assistant at the Institute for Applied Economic Research (IAW, Germany) and at the University of Tübingen. He holds a M.Sc. (equivalent) in International Economics from University of Tübingen, Germany, and also studied at the Catholic University of Buenos Aires, Argentina. In his Master thesis he estimated the effects of non-tariff measures on consumer prices.

**Alessandro Nicita** is an economist at the United Nations Conference for Trade and Development. His research focuses on issues related to international trade and development. His work has included the measurement of the effects of trade policies, the analysis of policies improving market access for developing countries, as well as the effect of trade policies on poverty and inequality. He has authored several publications in the field of international trade and economic development. He holds a PhD in Economics from the Université de Genève and a Master in Applied Economics from the University of Michigan.

**Ralf Peters** is the Chief of the Trade Information Section in the Trade Analysis Branch of UNCTAD. He coordinates and conducts work on trade data and trade control measures (tariffs and non-tariff measures) as well as on applied research and capacity building for trade policy makers. For several years, he was in UNCTAD's Trade Negotiations and Commercial Diplomacy Branch supporting developing countries in multilateral and regional trade negotiations. From 2009 to 2010 Mr. Peters was Chief Technical Advisor at the ILO for trade and employment. Before he joined UNCTAD he was Project Coordinator at the Centre for European Economic Research and Assistant Professor for economics. Mr Peters studied in Germany and the UK, has a master degree in mathematical economics and holds a Ph.D. in international economics.
