

Ralf Peters

Ralf Peters is the Chief of UNCTAD's Trade Information Section and Officer-in-Charge of the Trade Analysis Branch, Division on International Trade in Goods and Services, and Commodities. He is in charge of the programmes on trade policy research and trade control measures data, including non-tariff measures. He conducts analysis and implements technical cooperation projects on trade policy and development. For several years, he was in UNCTAD working closely with developing countries on the WTO Doha round negotiations on agriculture and non-agriculture market access. He was also Chief Technical Advisor at the ILO for trade and employment. Before he joined the UN he was Project Coordinator at the Centre for European Economic Research and Assistant Professor for economics. He has a master degree in mathematical economics and holds a Ph.D. in economics.

Alessandro Nicita

Alessandro Nicita is an economist at UNCTAD's Trade Analysis Branch. His research focuses on issues related to international trade and development. His work has included the measurement of the effects of trade policies, the analysis of policies improving market access for developing countries, as well as the effect of trade policies on poverty and inequality. He has authored several publications in the field of international trade and economic development. He holds a PhD in Economics from the Université de Genève and a Master in Applied Economics from the University of Michigan.

Christian Knebel

Christian Knebel is an economist in the Trade Analysis Branch at UNCTAD since 2012. He specializes on research regarding trade policy, particularly non-tariff measures (NTMs). In technical cooperation projects he is supporting "deep" integration efforts in several regional trade agreements. Previously, he worked at the Market Analysis and Research section of the International Trade Centre (ITC). He authored reports about obstacles to trade faced by companies in Malawi, Peru, Sri Lanka, Paraguay and Uruguay, and assisted their governments in addressing such barriers. He holds Master in International Economics from University of Tübingen, Germany, and also studied in Buenos Aires, Argentina. In his Master thesis he estimated the effects of non-tariff measures on consumer prices.
